Welcome to our latest e-newsletter. EnergyTalk is designed to bring you a selection of the latest news from Hayward Tyler. Please follow the news links where applicable or visit our website for more information.

New BCP Spares List

Hayward Tyler supply parts for both HT products and those of other OEM pumps and motors. We can supply standard replacement parts and reverse engineering services for obsolete parts. Our latest part list for boiler circulating pumps is now out.

Please contact spares@haywardtyler.com for a copy.

Super fast pump repair minimises downtime

HT Inc, Vermont, USA are no strangers to turning around emergency repairs to pumps and motors and last year repaired two Boiler Circulating Pumps in less than 10 days! Again, recently, the team had to pull out all the stops to repair a motor that had been damaged in storage. On arrival at the Inc service facility the motor was broken down into several pieces, repaired and shipped back to the customer in full working order in just 4 days, minimising loss of production. A fantastic achievement and one very happy customer.

Quality the driver for growth initiatives

Quality improvements continue to be driven across the Group in line with our Group Policy. New staff appointments include a Principle Quality Engineer and Product Quality Manager and further appointments will be made throughout the year. In addition a revision of our Group Business Management System has seen the improvement and introduction of new quality processes and procedures across all business functions.

Our Group Quality Policy sets out our objectives and can be viewed by selecting the link below.

Wet Wound Servicing

At Hayward Tyler we have been designing and manufacturing submersible pump and motor technology for over 100 years. As an authority on such technology we are arguably the first choice for wet wound servicing for the offshore oil and gas market. Hayward Tyler Global Services provide first class repair and overhaul services in our own service centres or we can provide a complete in-house wet wound service which allows customers to closely monitor quality and turnaround. We also have a fully equipped submersible test facility which can test units up to 20 metres long, with a voltage rating of up to 11kV.

Team raise £1,562 in charity fun run

11 hardy HT employees from our head office in Luton, UK, kindly gave up their time in April to run 6k in aid of Sport Relief. The team raised a fantastic £1,562 which will help support the efforts of thousands of others across the UK. The money goes towards those who are most needy in the UK and overseas. For more information on the charity please click on the link below.
